Manufacturing Ideas. Building Brands.

Contract manufacturing, private label and product development support for herbal, Ayurvedic, integrated topical and cosmetic product projects in Sri Lanka.

COMPANY PROFILE 2026

BIOZORPHARMA.COM

A practical manufacturing partner for growing brands.

BioZor Pharmaceuticals (Pvt) Ltd. supports entrepreneurs, healthcare professionals and established brands that want to move from a product idea to a professionally presented, market-ready manufacturing project.

CUSTOM MANUFACTURING	Review of customer-owned formulas for feasibility, sampling and commercial batch planning.
PRIVATE LABEL	A faster route using a suitable ready product under the customer’s own brand and packaging direction.
PRODUCT DEVELOPMENT	Support from concept and prototype through sample, pilot batch and production planning.

Our working approach

Projects are reviewed individually for formula feasibility, material suitability, product classification, claims, testing, labelling, packaging and applicable regulatory requirements. Sensitive formula information does not need to be shared in the first inquiry.

Manufacturing & development capabilities

01 Creams Ayurvedic oil-based creams, skincare and selected topical formats.	02 Balms Practical balm formats using agreed oil bases and suitable functional ingredients.
03 Gels & Emulgels Light-feel gel-based formats developed after compatibility review.	04 Lotions & Serums Selected skin, hair, body-care and personal-care formats.
05 Soap & Personal Care Selected cleansing and daily-care concepts aligned with brand positioning.	06 Selected Solid Formats Selected capsule or tablet projects considered after technical and regulatory review.

Scope clarification: BioZor does not present itself as manufacturing Ayurvedic oils, gulika or kalka from the beginning. Projects may involve agreed oil-base conversion or review of customer-supplied prepared materials.

From discussion to controlled production

01 Initial consultation	02 Formula & feasibility
03 Confidentiality & agreement	04 Sample / pilot batch
05 Testing, packaging & label	06 Controlled production
07 Quality review & release	08 Market-entry support

Selected product work

These examples demonstrate product format, packaging presentation and batch execution. Availability, composition, classification, label statements and commercial supply are subject to project-specific review.

Curesalic
Topical tube-pack product example.

Fungi Cure
Glycerine soap pack concept, 80 g presentation shown.

Additional portfolio names: Flexo Plus, Joint Safe, Easy Breeze and Moist Cure. Contact BioZor for current formats, pack sizes, availability and trade details.

Facilities & production environment

Mixing and processing equipment

Filling, handling and visual checking

BioZor’s production workflow includes project review, material and process planning, sample or pilot work where required, controlled batch production, filling, visual checks and documentation appropriate to the agreed project scope.

Why work with BioZor?

- **Practical project routes**
  Start with your own formula, a private-label option or a new product idea.
- **Confidentiality-minded**
  Sensitive formula details can be handled after the initial suitability discussion and agreed arrangements.
- **SME-friendly process**
  Clear early-stage discussion for entrepreneurs, professionals and growing brands.
- **Packaging coordination**
  Guidance on containers, pack sizes, label information and product presentation.
- **Commercial perspective**
  Support can extend to doctor, pharmacy and distributor market-entry planning.
- **Project-specific review**
  Technical and regulatory considerations are assessed before commitments are made.

Start a product project

Share your name or company, project route, preferred product format, estimated quantity and basic product idea. Do not include a complete confidential formula or ingredient percentages in the first message.
